DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/2/2010 has been entered. Claims 12 and 20 have been cancelled by Examiner's amendment below and claims 13, 15-18 and 21 are allowed.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms Allyn B. Rhodes on 12/16/2010.

The application has been amended as follows:

Please cancel claims 12 and 20.

EXAMINER'S REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The closest art of record, cited in the office action sent on July 7, 2010, are Lee et al US patent 4729190, Yang et al. US patent 6165529. Claims as amended are directed to a process for preserving post harvest produce comprising the step of coating the post harvest produce with a coating composition comprising an aqueous emulsion of less than about 50% by weight of a polyvinylidene chloride copolymer, and from about 0.0005 to 10% by weight of a non-ionic surfactant, wherein said copolymer is formed exclusively of co-monomers selected from the group consisting of vinyl chloride, vinyl acetate, methyl methacrylate, propylene, ethylene, acrylates, styrenes, and combinations thereof, and wherein the post harvest produce are fruits and vegetables.

Closest prior art to Lee teaches of coating composition including coating for seeds (See Lee Column 10, line 57 to Column 11, line 12). Lee's coating composition comprises "copolymers of monocarboxylic acids and acrylic series with one or more polymerizable vinyl or vinylidene compounds, such as vinyl halides, vinyl acetate, vinyl benzoate...methyl methacrylate, ethyl acrylate...methacrylic acids and its esters, and the like" (Column 4, lines 20-43, Column 8, lines 9-15 and Column 9, lines 35-40), which includes polyvinylidene copolymers. However, Lee coating composition requires an acid component such as monocarboxylic acids to be present (see Lee Column 4, lines 6-11 and also see applicant's remarks of 11/2/2010, page 4, last paragraph to page 5, paragraph 1), whereas the invention as claimed in claim 13 exclusively employs non-acidic polymers of polyvinylidene chloride.

The other closest prior art of record to Yang discloses a coating-for produce comprising polyvinyl alcohol, low molecular, weight starch, and a surfactant. *See*, Abstract. However, there is no disclosure or suggestion in Yang to coat produce with a composition comprising a polyvinylidene chloride copolymer as recited in amended claim 13. In fact, the only disclosure in Yang of coating produce with a polymer is a discussion of the disadvantages associated with coating produce with a synthetic polymer based on sucrose esters of fatty acids. *See*, c. 1, 1.66 - c. 2, 11. 10. (See applicant's remarks of 11/2/2010 page 5, paragraph 2 for further details.

Thus, a process for preserving post harvest produce comprising the step of coating the post harvest produce with a coating composition comprising an aqueous emulsion of less than about 50% by weight of a polyvinylidene chloride copolymer, and from about 0.0005 to 10% by weight of a non-ionic surfactant, wherein said copolymer is formed exclusively of co-monomers selected from the group consisting of vinyl chloride, vinyl acetate, methyl methacrylate, propylene, ethylene, acrylates, styrenes, and combinations thereof, and wherein the post harvest produce are fruits and vegetables as instantly claimed is free of prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JYOTI CHAWLA whose telephone number is (571)272-8212. The examiner can normally be reached on 9:00 am to 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Keith Hendricks can be reached on (571) 272-1401. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
